

Michael Lennartz

Student - web development full stack open source

About

I am 30 years old currently living with my partner and cat in an apartment in Täby/Stockholm.

The autumn of 2023 I began a two-year long education to become a web developer. I've always had an interest in IT and after several years working in the school sector I felt it was time to pursue this interest. Today I am happy to dedicate all my time to work with and learn programming. I have always found it easy to learn new things and contextualize new content quickly. In my work I value precision, efficiency, being well prepared and clear communication.

I also have a personal interest in game development and want to learn to develop my own games in the future, although currently I'm putting my full focus on web development.

When I'm not studying or working with projects, I enjoy playing guitar and make music. I also have an interest in boxing and try to practice it when I get the chance, either at home or at a gym.

SCRUM
ALM with Docker + Kubernetes

React/Vite/Vue
NEXT.js
Vercel/Render
Tailwind/Bootstrap/Sass
Node.js

Typescript
Python

Mongo/Mongo-express
SQL/Python-flask/SQL-Alchemy

Education

Nackademin

[Web development full stack open source](#) | August 2023 - June 2025

Ongoing education that includes frontend web design and functionality practice, as well as database management and API-building for medium sized full stack applications. The majority of assignments require effective group management and cooperation, adapting the agile work methods of SCRUM to simulate real work environments.

Stockholms Universitet

[Naturvetenskapligt basår](#) | August 2021 – June 2022

Took a supplementary year making me eligible for higher education within natural sciences. Included subjects are physics, chemistry, mathematics, and biology.

Work experience

Rydbo Friskola AB

[Teacher's assistant](#) | Sep 2019 –

I've mainly been taking care of planning and assisting the head teacher. Being a small school, you get to do a little of everything as part of the workforce there. Today I work only now and then, as I want to be able to really focus on learning web development.

Abios AB

[Editor](#) | April 2016 – June 2017

Responsible for the live-scoring of matches played around the globe in over 15 different games. The work also included researching and updating the database for keeping information up to date. This often included keeping in touch with other e-sport organisations internationally.
